

ARBOR

RESTAURANT

After lengthy searching, deliberations and a lot of tasting with our specialist partners, we've developed a wine list that really complements the food from the Arbor kitchen. Where possible we've chosen organic and biodynamic wines, but only if they meet stringent taste tests! With organic wines, only natural fertilizers and natural preparations against rot or mildew may be used; chemical herbicides and pesticides are banned. Many winemakers who practise organic viticulture prefer not to go through a certification process - they just farm that way because it's better for the wine. Biodynamic viticulture views the soil - and indeed the Earth - as a living entity, with daily and seasonal rhythms by the positions of the moon, planets and stars. A holistic approach respects these forces and acknowledges the use of special preparations instead of chemicals to enhance growing conditions. We hope you enjoy!
